EXPERIENCE

Game-U (Virtual) | March 2022 - Present
Data Science & Game Design Instructor / Curriculum Developer

- Instruct students (ages 18+ and younger learners) in **full-stack web development, game development, and data science**.
- Teach **JavaScript, Lua, C#, React, Vue, Flutter, Python, and SQL** while emphasizing **debugging, GitHub workflows, version control, and software best practices**.
- Develop and deliver interactive labs covering **databases, object-oriented programming, and algorithms** to prepare students for real-world software engineering careers.
- Guide students in **front-end and back-end development**, focusing on **Node.js, Express, REST APIs, and authentication**.
- Provide individualized mentorship, fostering strong **problem-solving skills and professional development**.

iCode - Computer Science and Robotics School (in-person) | June 2020 - Sept 2022
Technical Lead Instructor / CS Instructional Designer

- Led instruction in **Python, JavaScript, SQL, and database management**, teaching students how to build and optimize applications.
- Designed and implemented curricula covering **data structures, algorithms, debugging methodologies, and Git/GitHub workflows**.
- Developed project-based learning experiences, teaching students to **build full-stack applications** and manage code repositories.
- Provided instruction on **object-oriented programming (OOP), Agile methodologies, and test-driven development (TDD)**.

Freedom Learning Group/Coursera | Remote | June 2023 - Sept. 2024
Instructional Content Author / Instructional Designer - Data Science

- Created **interactive learning modules and technical documentation** for **data science, AI, and machine learning** concepts.
- Designed **hands-on programming exercises** in **Python and SQL**, enabling students to **apply real-world data analytics skills**.
- Developed technical tutorials using **Articulate 360, Adobe Creative Suite, and Camtasia** to enhance learner engagement.
- Collaborated with SMEs to ensure **technical accuracy and instructional effectiveness**.

Atomic8Ball | Remote | October 2018 - January 2020
Content Writer & Full-Stack Developer

- Wrote **10,000+ words** of technical documentation covering **APIs, cybersecurity, SaaS platforms, and software best practices**.
- Developed **interactive learning demos** for software solutions, incorporating user feedback for iterative improvements.

LoveHandle | Remote | February 2021 - September 2021
Frontend Developer

- Developed and maintained customer-facing applications using **JavaScript, HTML, CSS, and Liquid (Shopify's templating language)**.
- Implemented **UI/UX enhancements** and improved mobile responsiveness for better user experience.
- Created technical guides and documentation for internal teams and customers.

CORE COMPETENCIES

Full-Stack Development: JavaScript (ES6+), React, Vue, Node.js, Express, PostgreSQL

Software Engineering Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, TDD

Debugging & Code Review: GitHub workflows, version control, professional development for junior developers

Technical Instruction & Curriculum Development: Project-based learning, immersive coding instruction, mentorship

Instructional Design: Articulate 360, Camtasia, Adobe Creative Suite (Illustrator, Photoshop, Premiere Pro)

Content Development: Hands-on labs, tutorial creation, e-learning modules

CERTIFICATIONS

- **NVIDIA Accelerated Computing Training:** Getting Started with Accelerated Computing in CUDA C/C++ (In Progress)
- **Articulate Storyline Certification** - Completed

EDUCATION

Texas Woman's University
Bachelor of Business Administration (B.B.A.) | Enactus Member

Brookhaven College
Certificate in Computer Programming | Post-Graduate

PROJECTS

Exploration Code — An E-Learning Platform for Kids and Adults.

- Built using **Carrrd.co** and **Articulate 360** to deliver interactive **coding, game development, and digital literacy** courses.
- Designed a user-friendly curriculum for self-paced learning.
- <https://explorationcode.org/>
